

Projekt Manager (m/f/d) Climate Change Education (international)

Education Department

Munich · Full-time · As soon as possible
Initially limited to two years

At a time of profound global change, Siemens Stiftung, a non-profit foundation, is committed to advancing sustainable societal development. Together with people and communities around the world, we create opportunities for action to actively shape social and ecological transformation. Our international work focuses on three closely interconnected fields: Basic Services, Digitality, and Climate. We approach the challenges in these areas collaboratively and see them as opportunities for innovation and positive change. Through our projects in education, social entrepreneurship, and culture, we promote access and participation, strengthen future-oriented competencies, and enable shared learning. By working across disciplines, we connect local action with global perspectives and contribute to resilience, social cohesion, and regenerative practices.

To strengthen our Education team based in Munich, we are looking to fill the following position at the earliest possible date, full-time and initially limited to two years:

Project Manager (m/f/d) – Education, with a focus on Climate Change Education (international)

Worldwide, science and technology education is a key driver of social participation, sustainable development, and the long-term safeguarding of our livelihoods. The climate crisis in particular highlights the importance of sound knowledge, systems thinking, and action-oriented competencies. With our international *STEMplus* education initiatives, especially in the field of Climate Change Education, we support education stakeholders and institutions in empowering teachers and young people to understand climate change, actively contribute to climate mitigation and adaptation measures, and take responsibility in a changing world. In doing so, we link educational practice with international climate and education policy frameworks and promote learning as an active contribution to societal transformation.

Your future responsibilities:

You will work as part of the Education Department with a focus on Climate Change Education and support the foundation's international project activities, particularly in Latin America and Africa, as well as cooperation with international organizations and networks.

- You manage and coordinate international climate change education projects across all project phases, from planning and implementation to reporting and evaluation
- You translate the foundation's strategic objectives and relevant climate and education policy frameworks (e.g. SDGs, NDCs, UNFCCC / Action for Climate Empowerment) into concrete project logics, work plans, and indicators
- You coordinate cooperation with international partner organisations (e.g. education networks, NGOs, public institutions, multilateral organisations) and accompany collaboration processes across diverse regional and institutional contexts
- You are responsible for project monitoring, as well as the qualitative and quantitative assessment of project results, ensuring consistent documentation
- You synthesise project experiences, learning outcomes, and evidence of impact for internal decision-making, external reporting, and strategic development, and support the foundation's communication activities in the field of climate change education
- You support the international positioning of the foundation in climate change education, including participation in international expert events, conferences, and networks
- You represent the foundation in relevant international dialogue and exchange formats and work closely with internal colleagues and external project partners

What you bring in:

- A university degree, e.g. in education sciences, environmental or climate sciences, international relations, development cooperation, or a comparable field
- Several years of professional experience in international project management, ideally in the fields of education, climate, or sustainability
- A solid understanding of climate change (mitigation, adaptation, resilience) and the role of education as a supporting lever for climate policy and societal transformation
- Experience working with international partners, preferably in Latin America and/or Africa
- Basic knowledge of international climate and education policy frameworks (e.g. SDGs, NDCs, UNFCCC, UNESCO) and an interest in their practical application
- Excellent written and spoken English and Spanish; knowledge of German is an asset
- A structured, self-reliant, and reliable working style combined with intercultural sensitivity
- Willingness to travel and confidence in international professional settings
- Very good command of MS Office and experience with digital project management and collaboration tools

What we offer:

- A content-rich and strategically relevant position in the field of Climate Change Education
- The opportunity to actively shape international education projects in diverse regional contexts
- A role within an internationally active foundation with flat hierarchies, short decision-making paths, and close team collaboration
- Comprehensive onboarding, flexible working hours, and the option of mobile working
- Space for independent work, learning, and professional development within a creative and committed team
- A meal allowance as well as optional subsidies for corporate fitness programs or the "Deutschlandticket" for urban and regional mobility
- An attractive workplace in the heart of Munich with excellent public transport connections

Apply now!

If you are motivated to contribute your expertise and commitment, we look forward to receiving your application.

Please send your application documents (CV, relevant certificates, and a compelling cover letter), including your salary expectations and earliest possible starting date, **by 9th May 2026** to: career.bildung-cce@siemens-stiftung.org

Applications are reviewed continuously, and we may reach out to qualified candidates before the application period closes.
